LLumar glass treatment films are manufactured exclusively by **CPFilms Inc., a Unit of Solutia**. CPFilms is a member of the Association of Industrial Metallizers Coaters and Laminators. All data has been measured in accordance with AIMCAL standards. All values averaged from routinely accumulated quality control data.

*New product - AT15CHSRHPR replaces former AT20CHSRHPR construction.

LLumar glass treatment films protect both you and your car from the damaging effects of the sun.

LLumar automotive films are designed to enhance your vehicle's appearance and to provide the performance features you desire. Choose from an array of optically clear and tinted films that range from high-performance dyed films to metal combinations and top-of-the-line all metal films to customize your vehicle.

Reduce the Sun's Heat and Glare - Driving a car in direct sunlight can result in fatigue, eyestrain and loss of concentration. Solar films filter out the worst of the sun's heat and glare while letting light in so you have a clearer, more comfortable view of the road.

Decrease Fading - Exposure to direct sunlight can cause your vehicle's interior surfaces to fade and crack over time. LLumar film can filter out up to 99% of the damaging UV rays. Blocking the UV rays will help to protect your skin and extend the life and beauty of your vehicle's interior.

Improve Safety & Security - LLumar safety/security film is now available for vehicles. When this film is applied to the inside of a window it holds shattered glass in place — reducing the likelihood of personal injury, protecting property and deterring thieves. LLumar safety and security film is an invisible shield against the unexpected.

Demand Quality - The best films require the best technicians. LLumar Authorized Dealers are carefully selected by the manufacturer for their commitment to providing professional installations and customer service. Factory-training ensures quality and performance.

Known for their quality and patented scratch-resistant coating, LLumar films are durable and virtually maintenance free.

*Don't make uncomfortable heat buildup, unwanted glare and faded interiors part of your road trips...
take control of the sun and enhance your car's good looks... with LLumar.*
